

AI Translation & Captions

Wordly Surpasses \$200 Million in Customer Savings

Since launching in 2019, Wordly’s live AI translation and captioning platform has delivered **over \$200,000,000 in savings** to customers worldwide — including multinational corporations, nonprofits, schools, government agencies, and religious organizations.

Sample Cost Savings Scenario

A company runs 1-hour weekly meetings throughout the year (50 hours total).

While presenters speak English, attendees join in English, Spanish, French, and Japanese.

This requires translation into 3 languages, typically needing 6 human translators (2 per language) for live coverage.

Human Interpreter Cost

50 hours x 6 interpreters x \$100/hr = \$30,000

AI Interpreter Cost

50 hours x 1 AI interpreter x \$100/hr = \$5,000

Cost Savings = \$25,000 (83%)

Calculate Your Savings
