Wordly

Event App Information

Why add Wordly to your event app

Give attendees easy access to live translation and captions by adding a Wordly link to every session listed in your event app. The link opens the Wordly Attend web app for that session, where attendees can choose their language and start following along right away.

Use event app links in addition to posting signs and making an announcement at the start of every session. Using all three helps ensure every attendee knows you are providing this valuable service.

For best results, add the links when you build your session schedule, then test a few before the event to confirm each one opens the correct session.

Event App Link

Suggested link text: Access live translation & captions

How to add the links

1. In your Wordly portal, open **Sessions** and select the session.
2. Choose **Get Links to Join**, then select **Copy Attendee Link** under **Join On Personal Devices**.
3. Paste the link into the matching session listing in your event app, and repeat for each session.
4. Use the suggested link text so attendees recognize it across every session.
